2014 Edition

Prescription Drug Guide

This Prescription Drug Guide is used in conjunction with America's underwriting guidelines and does not reflect the full underwriting standards of America or all prescription drugs considered by America. This Guide provides a list of common drugs, their uses, and eligible Eagle Premier Series products available to an applicant taking one of the listed drugs. America products listed below under the Benefit Eligibility column are not a guarantee of policy issuance, and prescription drug combinations may result in ineligibility. Further, any prescription drug used in combination with a related or unrelated medical condition could result in ineligibility. Each application is reviewed based on the circumstances and conditions represented therein and may involve additional requirements. Both this Guide and the full underwriting guidelines used by America are subject to change. **Note: The brand name drug is in ALL CAPS and its generic equivalent is next to it in lowercase letters. This guide allows you to search either by generic or brand name.**
